EiWiki:Users

A user who edits through an account they have registered, may immediately create pages in any namespace (except the FORwiki namespace, and limited to 8 per minute) and may also e-mail other users if they activate an email address in their <u>user preferences</u>. All logged-in users may mark edits as minor. They may purge pages without a confirmation step, but are still required to answer a CAPTCHA when adding external links. They may also customize their Wikimedia interface and its options as they wish, via <u>Special:Preferences</u> or by adding personal CSS or JavaScript rules to their <u>monobook.css</u> or <u>monobook.js</u> files.
