

EiWiki:Users

A user who edits through an account they have registered, may immediately create pages in any namespace (except the FORwiki namespace, and limited to 8 per minute) and may also e-mail other users if they activate an email address in their [user preferences](#). All logged-in users may mark edits as minor. They may purge pages without a confirmation step, but are still required to answer a CAPTCHA when adding external links. They may also customize their Wikimedia interface and its options as they wish, via [Special:Preferences](#) or by adding personal CSS or JavaScript rules to their [monobook.css](#) or [monobook.js](#) files.
