- `{{border|Foresight studies! | width=10px | color=#ada}}` results in 

Syntax

Basic

```
{{border|element}}
```

...where *element* is the image, text, etc around which the border is to appear. The border will be a solid light grey color (#ddd) and 1px (1 pixel) wide (default settings; see below).

Full

```
{{border |element |width=width |style=style |color=color}}
```

Parameters

element

(required) The element (image, text, etc) around which the border is to appear.

width

The width (thickness) of the border (default 1px).

style

The border's style: *solid* (default if the parameter is not used), *dotted*, *dashed*, *double*, *groove*, *ridge*, *inset* or *outset*.

color

The border's color (default #ddd, otherwise recommend a named color).
